**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of group I, claims 21-46 in the reply filed on 8/16/2010 is acknowledged. The traversal is on the ground(s) that claims 60-65 are the method for producing a reactor as claimed . This is not found persuasive because method claims require further search and/or consideration in or class/subclass.

The requirement is still deemed proper and is therefore made FINAL.

***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the a reactor having an inner metal wall and floating lining that are free from fluoropolymer being positioned against the inner metal wall of the reactor must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlosberg et al. [US 4,161,689] in view of Petrucci [US 3,962,373].

Schlosberg et al. discloses a reactor comprising:

- an inner metal wall and an inner lining such as glass, ceramic, rubber, plastic or the like.

Schlosberg et al. discloses the instant claimed invention except for the specific of the inner lining.

Petrucci discloses a composite that could be molded/impregnated into different plate/shapes for multi-purpose uses. The composite comprising fluoropolymer and carbon fibers.

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use the composite material of Petrucci molded/impregnated into plate to use as the inner lining of Schlosberg et al. for the purpose of improving corrosion.

Regarding claims 35-37 and 40-45, the specific thickness ratio of the plate would have been an obvious design consideration based on the intended applications/environments use.

Regarding claims 37-38, Petrucelli discloses the composition having the material as claimed.

***Allowable Subject Matter***

Claims 21-33 are allowed.
